CAREER OBJECTIVE

Soon-to-be Computer Science graduate eager to continue exploring the inspiring, innovative field of Android Development. As a seasoned intern, I am looking to join an Android Development team with AT&T as a junior developer.

WORK EXPERIENCE

Android Developer Intern

Genesis10

May 2021 - current / San Jose, CA

- Designed and built 12 innovative, intuitive and responsive native apps
- Managed coding, packaging and deployment, and monitoring performance and stability for 10+ apps
- Analyzed and guaranteed performance quality and responsiveness of 100% of applications
- **Investigated and resolved 300+ issues** reported by testing teams to determine impact and root cause
- Worked with 2 Quality Assurance teams for end-to-end testing and certification of product delivery
- Overhauled team development-related processes that accelerated delivery, drove innovation, lowered costs, and improved quality
- Completed 15+ two-week sprints and participated in sprint retrospectives and daily standups
- Owned the entire lifecycle of feature development for 12 applications, from design to launch

Android Developer Intern

Novalsys, Inc

January 2021 - May 2021 / Milpitas, CA

- Worked with 4 mobile engineering team members to build new features
- **Assisted with bug fixing and improving performance on 8 different applications**
- Maintained a cutting-edge knowledge of Android development via 100+ hours of personal instruction from senior developers
- Executed 100% data integrity and validation
- Participated in all stages of development with 8 other Android developers of various skill levels
- Worked with 2 product and design teams to innovate existing and new experiences
