Software engineer with ability to learn and collaborate in rapidly changing environments and compositions. Worked through 1000+ hours of bootcamp structure, learning JavaScript, Node.Js, React.Js, and Python. Eager to tackle web development/design challenges to achieve lasting impacts on user experience.

## Work Experience

### DonationXchange - Web Developer Intern

July 2021 - current                                          Chicago, IL

- Actively engaged in web creative design and development.
- Assisted in product development and enhancements of current suite to boost engagement by 15%.
- Provided technical support for 10+ existing online products.
- Provided professional customer service, managing 20+ phone and email requests a day.
- Created and deployed mobile-first applications while learning new languages and frameworks.
- Developed innovative techniques to allow clients to use headless CMS's with technology like Contentful and Google sheets to manage all marketing material.

## Projects

### Moody Messenger - Creator

- Developed front-end user experience using React.JS, Python, Redux, and RESTful APIs.
- Allowed users to have a customized experience based on the mood of the user throughout the entire experience of the application.
- Built app with React while managing State through Asynchronous Redux Actions using Redux Thunk.
- Implemented the React Router DOM to allow nested RESTful routing.

### Food Fanatic - Creator

- Designed a business locator for food businesses with 4.5+ star ratings.
- Developed front-end with HTML, CSS, Bootstrap, and Vanilla JS.
- Created Mobile Responsive User Experience with CSS Grids that allowed the user to view any searched business on a Google Map experience.
- Integrated with Google APIs to search for businesses based on either longitude/latitude combinations, addresses, and business names.
