WORK EXPERIENCE

Junior Data Analyst
Sunbit
📅 July 2020 - current 📍 San Francisco, CA

- Designed over 310 ad hoc queries with SQL in Cognos ReportNet, examined reports, and presented findings in PowerPoint and Excel
- Built 140 complex SQL reports to audit $2.5M of pay and benefits for over 1,300 employees
- Reengineered standard operational procedures that improved 22 functional areas and data management
- Maintained reports with a 98% on-time delivery
- Facilitated data distribution, file sharing, and report tracking for over 4,000 files with SharePoint

Data Analyst Internship
DoorDash
📅 October 2019 - May 2020 📍 San Francisco, CA

- Performed advanced analytics functions, including data modeling and prescriptive analytics
- Utilized techniques and business intelligence (Power BI) to create 24 dashboards and 35 ad hoc reports to address business problems and streamline processes
- Supported 16 T-SQL / VBA applications and tools

PROJECT

Digital Analytics Association (DAA)
Member

- Led Gender and Age detection project leveraging data from organizational membership and associated websites
- Created a Python application that predicts the age and gender of a site visitor based on a single image
- Used computer vision tools to recognize digital images and Deep Learning to determine age and gender based on facial characteristics
- Published applications including AI algorithms that accounted for makeup, facial expressions, lighting, and obstructions in gender and age detection
